Quality Charter

I.C.E. is a key reference in the sector of water and bottled drinks. Since 1987 we have been serving major international groups and local bottlers in every corner of the globe thanks to our unique know-how based first and foremost on our Human Resources and the sharing of our Code of Values. It is applicable to every member of our team and is evident in all our day-to-day commercial and technical activities. By choosing to work with I.C.E. we will share with you

Our vocation: the guarantee of quality
Controlling the quality of the services we provide to our customers means controlling our own quality, via our employees:

- by developing their spirit of innovation and initiative,
- by ensuring that they feel fulfilled in their work,
- by promoting teamwork.

Our skills
Ingénierie, Conception, Expertise: Engineering, Design and Expertise are three professions which we bring together for our customers. This is what makes us unique.

- By our Engineering activity, we support you in transforming your systems to make them more reliable and more effective.
- By our Design activity, we complete your project in strictest compliance with our commitments.
- By our Expertise activity, we provide a bespoke solution to your problems via our team of experts in specialist professions: quality expert, water-treatment engineer, control engineer, installation and commissioning expert etc.

Our expertise in water treatment, the capitalisation on our knowledge for over 30 years - allied with our intimate knowledge of the problems encountered by those in the bottled water industry - make I.C.E. a technical expert in its field and a specialist in the protection of bottled water quality.

Our mission: to serve our customers in compliance with our values

- While respecting our customers' work and our commitments to our customers
- While protecting the quality of their drinks
- While supporting businesses to boost their performance on their market.

Our principles of action

- To intervene in a logic of co-production: I.C.E. together with its customer builds the best solution.
- To commit all our skills with rigour and passion.
- To conduct each mission with the greatest integrity, with total confidentiality, in a context of mutual respect for people and cultural openness.

Our ambition
To be the leader in the field of drink bottling where the quality of the water used is paramount in terms of food safety.

- To promote the protection of quality.
- To constantly innovate to give our customers a clear lead.
- To use new technologies to open up new markets to us.
- To guarantee a quality level which satisfies the most demanding customers.

Innovation | Expertise | Development | Design | Turnkey Project | Training | Guarantee | Technical Assistance | Service

The success of your water production project is guaranteed by I.C.E. (Ingénierie - Conception - Expertise). The multidisciplinary approach of its team of engineers means that you can rely on its help, assistance, installation and starting-up for your equipment, as well as training for your staff. Its long and diversified experience is offered to you and will allow I.C.E. to securely determine the treatment definition, reliability and robustness. All parameters which are able to have an action on the final quality of your product are considered and mastered. Our worldwide network of representatives and agencies are guaranties for quick technical interventions and assistance. Our preventive and corrective actions will definitely match your specific needs.
