

## ICE WATER MANAGEMENT at Gulfood Manufacturing in Dubai

ICE Water Management will be exhibiting at the Gulfood Manufacturing to be held on 7– 9 November 2021 in Dubai. ICE WM is a recognized expert in the engineering, commissioning and life time technical support of water treatment systems in the beverage industry worldwide.

### *Set forth its know-how and expertise to the MENASA customers*

ICE WM will showcase its unique know-how in water process turnkey projects, ranging from well to filler inlet, with CIP, specific audit, training (bacteriological safety, quality control & management, remineralization recipes) and spare parts servicing and installation. This new Gulfood Manufacturing edition will be an excellent opportunity for beverage producers from the MENASA region to exchange and get full support from ICE team about their new projects.

### *Towards a sustainable development approach for OPEX reductions*

As a specialist of Total Water Management, ICE WM offers solutions to enhance quality and ensure water savings at each step of the process. ICE team will be pleased to present its WASA™ methodology that includes audits and expertise missions, optimisation and compliance of discharges/wastewater with local regulations. Along with its analysis, ICE Water Management can offer a technological upgrading of customers' equipment or a dedicated WASA™ range to reduce discharges, reuse water in the water treatment process, and recycle water in the treatment line, or in utilities.

### *Developing a strong operational presence in Riyadh, Saudi Arabia*

With its new entity in Saudi Arabia, ICE Water Management wants to strengthen its presence in the Saudi Kingdom in order to support closer its existing customers base. It will offer technical support, after-sales services, spare-parts and diagnostic without wasting time.

## About us:

French Company set up in 1987, ICE Water Management is specialised in water management in the beverage industry. It offers turnkey projects ranging from well to filler inlet and CIP, including engineering study, equipment, installation, services, and audits. For the past 30 years, ICE Water Management has been engineering and commissioning hygienic water treatment systems for beverage industries worldwide (bottled water, soft drinks, etc...) and has developed tailor-made answers taking into account bottlers constraints and production goals.

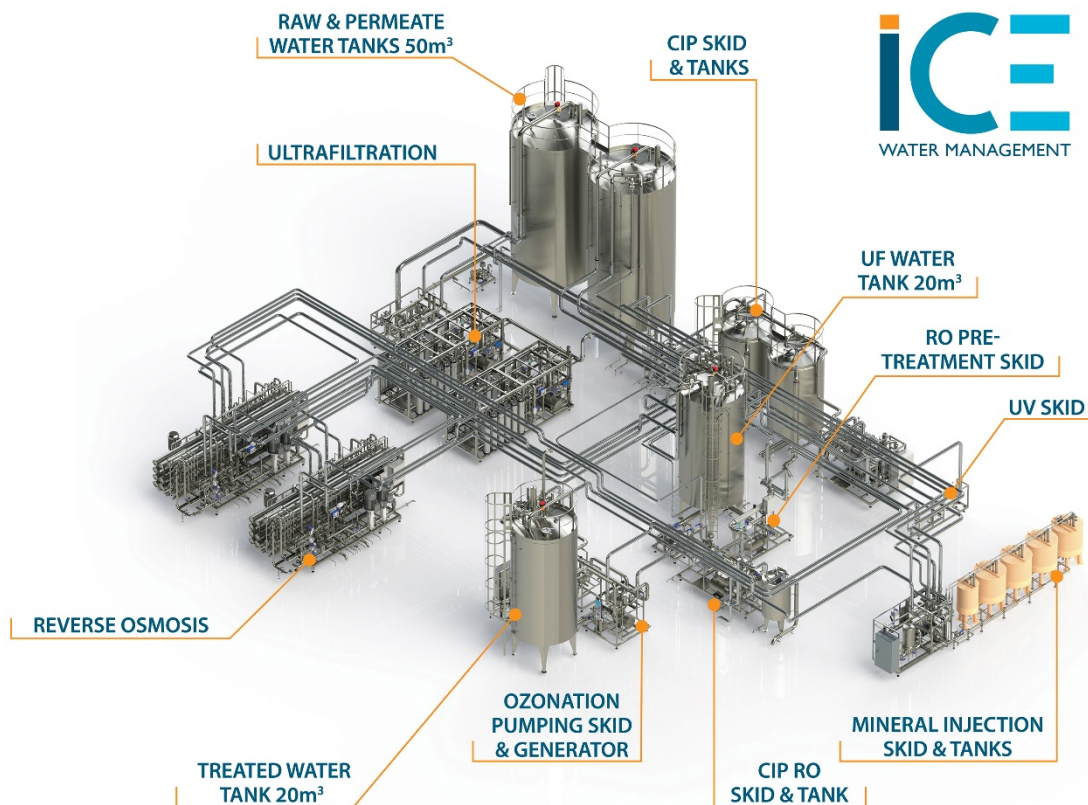

**ICE Water Management is a partner of the biggest water and beverage brands and positions itself as an expert in quality and processes.**
